

Providing Information Bandwidth At the Fender™

Pegisys™

I N T R O D U C I N G

Pegisys – Revolutionizing Automotive Diagnostics Untethered Diagnostics = Freedom = Time Savings = Productivity

Information at the Fender

The Pegisys Vehicle Communications Interface (VCI) links wirelessly to the host device. The Technician can then scan the vehicle from anywhere within a 30-foot (9-meter) radius.

- Free from conventional cable tether
- Dependable 802.11b/g WiFi technology for access to Web-repair resources
- Work where the vehicle isn't... even when it's up in the air
- Enjoy complete freedom to manipulate hard-to-reach computer-controlled components

Easy to Use—Intuitive Tech-Friendly Graphics

Pegisys features a truly innovative Graphical User Interface (GUI). Combined with Fast Touch screen control and the SpeedScroll™ keypad, the tool delivers the fastest access to information in the industry.

- SpeedScroll's rotational control allows you to quickly scroll through menus (left side) and independently manipulate data (right side). Scroll through long data lists fast, even wearing gloves.
- The screen itself is also a navigation method. The interactive touch screen and the unique GUI allows you to use your finger or the stylus that's included. It's that simple.

Built for the Shop Environment

Shop-tough, the Pegisys tool is engineered inside and out to work the way a Technician needs it.

- Made of super-resilient ABS plastic—like that found in football helmets and car bumper extensions
- Resilient rubber is molded in for maximum protection on corners and edges

Unique eLearning Resources

- Specifically designed training modules with video
- Instructor guided, interactive testing and certification
- Only available at www.PegisysOTC.com. (Registration required)

Optional Software and Accessories

- USA European Starter Kit (includes cables)
- Heavy Duty Standard Starter Kit (includes cables)
- Hot Swap Battery Kit
- Scope Accessories
 - Pressure/Vacuum Adapter
 - Low & High Amp Probes
 - Ignition Capacitive Probe
 - Piercing Probe Set

AirBridge™ Wireless Technology

Pegisys AirBridge Wireless Technology features high speed WiFi Digital Input / Output (SDIO) 802.11b/g mini cards to wirelessly communicate with the vehicle as well as access the Internet* right from the tool. As technology changes, AirBridge Wireless connectivity means you can field update to the latest and fastest wireless communications!

Information at the Fender

Wireless Vehicle Connection

You make money at the fender. And staying there to get relevant timely diagnostics keeps you productive. Meet Pegisys—the most advanced hand-held aftermarket scan tool available—it's designed to give you more freedom to work productively. Our exclusive AirBridge™ Wireless Technology means you can now be completely untethered from the vehicle (even when it's up on the lift), and have immediate Internet access* to real time web-enabled diagnostic assets, including Direct Hit Technician™ from Identifix® (available in Fall 2008).

Talk about coverage and features! Pegisys provides over 27 years of vehicle coverage (1980 – 2007) for 44 different vehicle makes from over 25 different manufacturers. It comes preloaded with expanded Scan (Pathfinder™) and Scope (Infotech™) diagnostics, Repair-Trac™ Tech Tips, Automated System Test™, includes large screen touch control, SpeedScroll™ Thumb pads, built-in 2-channel scope, audio & video capability and so much more.

Bottom line? Pegisys unleashes your potential to work smarter and faster at the fender—that's good for the shop and good for you. Pegisys is a diagnostic freedom productivity machine. And it's from OTC, the One Tool Company professional technicians trust.

Diagnose and Repair Vehicles Faster than Ever Before!

Extensive Vehicle Coverage (1980 -2007)

- Fast Vehicle Entry (25 different OEM's & 44 vehicle makes)
- Enhanced USA Domestic, Asian and European vehicle coverage
- DTC's, DataStream and Bidirectional Test capability
- Frequent Internet direct-to-Pegisys subscription updates keep vehicle coverage current
- Interactive touch screen navigation
- Tech-friendly user graphics

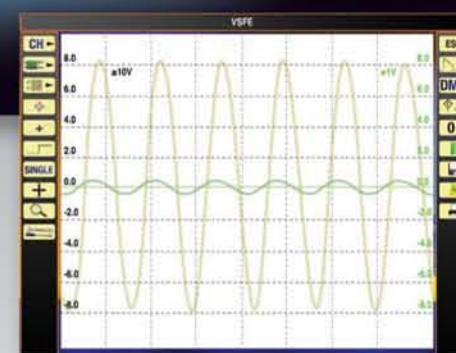

Exclusive Diagnostic Tests Save Time

- Automated System Test performs a Comprehensive Health Test that reports critical vehicle data in a fraction of the time it takes for manual, step-by-step procedures
- Quick DTC Scan™ searches all available systems for Diagnostic Trouble Codes in seconds
- All available diagnostic information and code tips populate the Navigation Bar when a DTC is selected – no looking through complicated menus to find the information you need
- Review, store, and print the Summary Report for review with the customer or your file

Interactive Data Stream Information

- Sort long data lists Alphabetically, by Graphed, or by those you Selected
- View data by Line Graph, Bar Graph, On-Screen LED, or Digital formats
- Freeze, Select, Record, and more with simple button selections in the Navigation Bar – no hidden or hard to find functions
- Record data to the hard drive or external memory device for sharing, storage or review
- Full data item descriptions stops the guessing game of interpreting short acronym based descriptions
- Super-fast SpeedScroll thumb pads for scrolling through long data lists

High-Speed 2-Channel Scope

- Fast 40 MSPS Sample Rate 2-Channel Lab Scope
- Single Cylinder Ignition Scope
- Graphing Digital Multi-Meter
- Integrated vehicle specific component test information delivers the necessary information to turn a drivability or component fault into a fast, accurate repair
- Quickly zoom or drag Cursors and Triggers where you want them using the interactive touch screen
