

# MULTIGAS 8250

2014 NEW  
FUNCTIONS

DOUBLE USE  
**GAS R-134a**  
**GAS R-1234yf**

The recharge station built for the **future technology** but equipped to handle today's A/C requirements as well.

The best of Brain Bee technology for a top performance working tool.

## A STATION WITH **DOUBLE LIFE**

Brain Bee is taking you into the future starting from today. **MULTIGAS 8250** is indeed the **dual-use station**.

You can use **it right now** to recharge systems employing gas R-134a.

And thanks to its advanced **BRAIN BEE 1234 TECHNOLOGY** design, the **MULTIGAS 8250** can be easily converted from R-134a to R-1234yf if required in the future using the special **TRANSFORMATION KIT** (optional) thus getting a double return on your original investment.

READY FOR INSTALLATION OF **GAS 1234yf IDENTIFIER**

## EVERYTHING UNDER **CONTROL**

**MULTIGAS 8250** is the ideal A/C Station for those who want to obtain the best results without any complications.

**MULTIGAS 8250** also includes electronic gauges and valves to deliver an extremely friendly and intuitive operating interface.

All serviceable parts and components are easily accessible and located in a position that allows for fast replacement.

Hoses too, equipped with quick couplers, have been positioned externally so that you don't have to open the station in case of replacement.

**MULTIGAS 8250** is equipped with the most comprehensive database for R134a and R-1234yf on the market, which can be easily updated via CLIMA SOLUTION (option).

**MULTIGAS 8250 can be easily updated:** using CLIMA SOLUTION (optional), every available update can be downloaded from the web and installed on the station very easily. CLIMA SOLUTION allows you to export recharge service reports and save them on your PC.

## **POWERFUL**, UNDER ANY CONDITION

Brain Bee invents the **SUPER CHARGE** technology (patent) to enable **MULTIGAS 8250** to operate refrigerant recovery from vehicles and full recharge effectively and rapidly, under any climatic condition.

Recharge is thus **100% GUARANTEED** (proven by laboratory tests as well as by garage tests).

**SUPER CHARGE** exploits the station operation to obtain the same condition that would otherwise be created by means of vessel heating systems. And results are **even remarkably better!**

**ADVANTAGE:** Under any climatic condition, refrigerant recovery from a vehicle is perfect, complete and always guaranteed.

The following recharge will hence take less time, **without any additional support function**, and will thus result in reduced power consumptions.

NEW!2014

## **NO MORE WASTE**

Often hindered by environmental factors (e.g.: temperature), failure to eliminate residual oil in the station will jeopardize the accuracy of the following charge, causing **waste** (of new oil) and **ineffective results**.

Thanks to the **OIL CLEAN** function, **MULTIGAS 8250** can force recovered oil discharge in the final phase, **allowing to save gas** (normally used by traditional technology to ease oil discharge).

**ADVANTAGE: OIL CLEAN** allows maintaining your recharge station **top efficiency**.

Calculation of the new oil quantity to be injected into the vehicle will always be extremely **accurate**, from the first to very last charge of the day, regardless of the environmental conditions.

NEW!2014

## **VACUUM BEYOND COMPARE**

As the other BRAIN BEE stations, **MULTIGAS 8250** is equipped with an **HPV - High Performance Vacuum Pump**, ensuring undoubted performance.

Even in comparison with larger capacity pumps, the **HPV PUMP** is still the winner: both in the first recharge of the day ("idle" condition), and in case of pump oil already "degassed", typical of an A/C station that has been running for several minutes, the HPV PUMP **reaches the best vacuum level more rapidly** (4 minutes earlier than a double-capacity pump); furthermore, after the first 20 minutes of vacuum, **it even reaches a lower vacuum level, thus ensuring improved operating efficiency**.

**ADVANTAGE:** The **HPV PUMP** can reach better vacuum levels **earlier**, ensuring **performance and efficiency** when recovering refrigerant from the vehicle.

# THE ALLY OF AGRICULTURAL MACHINES

NEW!2014

**MULTIGAS 8250** can be integrated with the new **AGRI&WORK FUNCTION** (option). Ideal for the management of **agricultural and earth-moving machinery**, this feature requires the activation of the special **AGRI & WORK FUNCTION** and the use of the **CLIMA AGRI DATABASE**.

These two allow to manage, via software, a combined series of gas recovery and injection phases, which are synchronized to achieve the **best charge**

## LONG LIFE PUMP

**LONG LIFE PUMP** (patent) is the special function allowing an extension of up to **1.000 hours** of the average life of the pump oil used in the station.

It can be activated when the station is not used, and allows for the automatic execution of a cycle of oil regeneration. Oil is hence purified and has a longer life cycle, thus **reducing operating costs**.

## DATABASE

**MULTIGAS 8250** is equipped with the most comprehensive **database for R134a & R1234yf** on the market, which can be easily updated via **CLIMA SOLUTION** (option).

With unlimited validity, it automatically provides for the specific recharge parameters for the vehicle being serviced. All the phases of the planned service are thus optimized and top performance is guaranteed.

## N-LEAK TEST (LEAK TEST WITH NITROGEN)

The whole BRAIN BEE CLIMA LINE is now equipped with the **N-LEAK TEST** function. Usually available on TOP RANGE models only, this function can be easily activated on **MULTIGAS 8250** as well, with the specific KIT (OPTION), allowing the execution of LEAK TESTS when the A/C system is under pressure conditions.

## TECHNICAL FEATURES

|   |   |
|---|---|
| GAS TYPE  | R-134A / R-1234YF                                     |
| DISPLAY   | ALPHANUMERIC - 4X20 LCD                               |
| PRINTER   | OPTIONAL  |
| SOFTWARE UPDATE                                     | VIA RS232 OR SD-CARD (*)                              |
| VESSEL LEVEL MEASUREMENT                            | ELECTRONIC SCALE                                      |
| MAX OPERATING PRESSURE PE                           | 20 BAR  |
| PED CATEGORY  | III   |
| CLIMA DATABASE - CARS ONLY                          | ✓ R-134A / R-1234YF                                   |
| DRAIN OIL CONTAINER                                 | 250 ML  |
| PAG INJECTION OIL CONTAINER                         | 250 ML  |
| POE INJECTION OIL CONTAINER                         | OPTIONAL (HYBRID KIT)                                 |
| UV DYE CONTAINER                                    | 250 ML  |
| OIL CARE VALVE (NEW PAG OIL CONTAINER)              | ✓   |
| VACUUM LEVEL  | 0,02 MBAR   |
| COMPRESSOR  | 14 CC   |
| PRESSURE SAFETY SWITCH                              | ✓   |
| DEHYDRATING FILTER CAPACITY (RECOVERED REFRIGERANT) | 45 KG   |
| AIR PURGE FUNCTION                                  | AUTOMATIC, ELECTRIC                                   |
| HP AND LP TAPS                                      | AUTOMATIC   |
| FILLING HOSES LENGTH                                | 4,5 M   |
| HP AND LP   | ANALOG DOUBLE SCALE FOR R134A AND R1234YF, 80 MM CL.1 |
| VESSEL PRESSURE GAUGE                               | ANALOG 40 MM PULSE-FREE                               |
| ECO LOCK  | PATENTED ✓  |
| INTERIOR + EXTERIOR FLUSHING (W/KIT)                | ✓ (**)  |
| INTERIOR + EXTERIOR FLUSHING VAS (W/KIT)            | ✓ (**)  |
| VESSEL HEATER FUNCTION                              | PATENTED ✓ SUPER CHARGE                               |
| AGRI&WORK   | ✓ (**)  |
| OIL CLEAN   | ✓   |
| HPV PUMP  | ✓   |
| MULTIPASS FUNCTION                                  | ✓   |
| UV TRACER FUNCTION                                  | ✓   |
| HYBRID FUNCTION                                     | ✓ (**)  |
| N-LEAK TEST - WITH NITROGEN                         | ✓ (**)  |
| LONG LIFE PUMP                                      | PATENTED ✓  |
| POWER SUPPLY  | 230 V - 50 HZ - 800 W                                 |

(\* ) CLIMA SOLUTION, OPTION (\*\* ) W/OPTION KIT

level.

**ADVANTAGE:** the function allows achieving the top efficiency, without any waste, under any A/C recharge condition, **even on work machinery for which the gas charge quantity is not known beforehand**.

## ECO LOCK® COUPLERS

**MULTIGAS 8250** is equipped with **ECO LOCK®** quick couplers, BRAIN BEE PATENT, allowing for the reduction of gas quantities, safeguarding of operators' safety and providing a **strong contribution for the protection of the environment**.

Its operation allows preventing the typical 'puff' effect, that is to say dispersion of refrigerant in the environment that usually occurs during the detachment of recharge hoses from the vehicle circuit.

## PRINTER

**MULTIGAS 8250** can be accessorized with a printer (option, with specific KIT)

## SPECIAL FUNCTIONS

**SUPER CHARGE** NEW!2014

**OIL CLEAN** NEW!2014

**AGRI&WORK** (OPTION) NEW!2014

**HPV PUMP** NEW!2014

**LONG LIFE PUMP**

**ECO LOCK®**

**REFRIGERANT 1234 IDENTIFIER** (with OPTIONAL kit)

**MULTIPASS** enables additional closed circuit filtering of the recovered cooling fluid

**FLUSHING** (with OPTIONAL kit)

**NITROGEN LEAK TEST** (with OPTIONAL kit)

**HYBRID FUNCTION** (con OPTIONAL kit). With this function, residual oil within the station can be completely replaced, with a view to preventing contamination between the oils used on traditional engine vehicles and those specifically used on hybrid or vehicles.

**Air-tight OIL CARE CONTAINERS**, preventing contact with air

**UV TRACER**

**NON-CONDENSING VENT VALVE** (automatic, electrically-controlled), it lets any air still present in the pipes to be expelled, thus speeding up the recovery phase and ensuring greater purity of vessel refrigerant

**MADE IN BRAIN BEE** all components and manufacturing are exclusively of European origin

Overall dimensions: 600 x 522 x 1145 mm (WxDxH)

Weight: 86 kg

Recharge vessel: 20 l

### OPTIONS

- **AGRI&WORK**
- **HYBRID FUNCTION KIT**
- **1234 TRANSFORMATION KIT**
- **NITROGEN LEAK TEST KIT**

- **FLUSHING/ FLUSHING VAS KIT**
- **CLIMA SOLUTION**
- **PRINTER**
- **REFRIGERANT GAS IDENTIFIER**
